AMERASEIKI
Great Machines...Great Prices...Great Service.

At **Amera-Seiki**, from the beginning, our focus was on making machines that were truly over-built. Starting with base castings that were much heavier and stronger than others, the added weight allowed for the use of more powerful motors and drive systems. While others may attempt to cut costs by trimming their castings, we know that in order to get the performance that our customers demand and expect, there's no replacement for absolute mass.
